

COM-MW TECHNOLOGY

## **Main specifications**

Parameters	Min	Typical	Max	Units
Frequency	DC	~	4	GHz
Attenuation	29.2	30	30.8	dB
VSWR			1.15	

## **Other parameters**

Power	20W Design assurance		
Impedance	50Ω		
Connector	4.3-10Female		
Surface	Black		
Product shell material	Aluminum		
Work Temp.	-40~+85°C Design assurance		

## Note

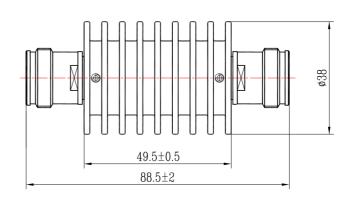

1. When installing attenuators, it is necessary to consider sufficient heat dissipation space and avoid installing them next to equipment with high heat output, otherwise the power capacity will decrease;

2. Small power attenuators do not have input and output directions, nor do they indicate directions. When high-power attenuators have input and output port markings, they must be connected to the equipment in the specified direction, otherwise the attenuator may burn out.

## Attenuator DA9-3020-0-4G-2252

FrequencyDC~4GHz, Attenuation30dB, 20W, 50Ω

Configuration(mm)
